

QC DASHBOARD

Write-up

April 2025

This write-up seeks to provide direction to the dashboard developers regarding the functionality, aesthetics, look and feel of the envisaged dashboard that will be developed to provide not only an almost real-time better project monitoring and insights on areas of excellence and improvement, but also a seamless access, enhanced reporting, an executive overview on health and project milestones in quality control.

In the end, it should:

**provide quick read consumable pieces of information and statistics,
be engaging,
easy to use and
inform decision making.**

CORE LAYOUT COMPONENTS

Framework

FUNCTIONALITY

Activity Tracking:

This component to provide a general overview of all project-related activities, including launch, approval status, back-check and audio listen-in efforts, deadlines and upcoming events (coding, analysis, final reporting). It helps keep track of project progress and identify potential hindrances.

Alerts will be good to have.

Project Deliverables:

This component will need to show the real-time progress of each quality control project deliverable and flag any blocked deliverables due to issues or dependencies.

It will help ensure that projects stay on track and that resources are allocated effectively.

Risk Status:

This component to display information about potential risks to the project, including their impact and probability. To aid proactively address risks and mitigate their potential negative effects.

Risks statistics will feed from activity tracking numbers and deadlines.

AESTHETICS

Interactive Elements:

This borders functionality.

Include drill-downs, hover effects, and customizable views, allow users to explore data in more depth and gain a better understanding of the information.

Customizable Widgets:

This will be a good-to-have if feasible.

Widgets will help provide quick access to essential information in a visually appealing way. The idea is that the widgets will display key metrics, user statistics, or recent activities, allowing users (both admin and other users) to get a quick overview of the most important information.

ACCESS, UPDATES AND REPORTS

Updates and Refresh

- **Updates:** Either monthly or quarterly or when data is available.
- **Data Refresh:** Twice a week overnight.

Access

- **Access:** Grant admin rights to the Country Manager, Operations Lead, Field Managers, Project Managers, QC Executive and QC Manager, the latter grants project-specific read-only access to QC Officer in-charge of direct oversight of any given project. Leave this flexible based on access needs that may come up.
- Make interface accessible both on hand-held mobile device (for insights on the go) and either laptop or desktop.

Export and Imports

- **Exports:** This will be for local reporting; nonetheless, provide for downloadable exports (xls and SAV formats) that can be used offline to stakeholders who may not have direct access but need to have the information.
- **Imports:** Allow to either manually import or read from a database-preferably *iField* if feasible.
- Imports will be particularly necessary when there is a need to report on the health of projects while working with approved third-party data collection platforms (for instance, *SurveyCTO* and *Survey Solutions*).

QUALITY CONTROL KEY PERFORMANCE INDICATORS

KPI	Brief	Desired Chart/Graph/Alert	Comment
Summary Metrics	Overview of key variables being tracked below and those highlighted on slide 11	Column	
Error Types	Itemized errors (straight-lining, inconsistencies, missing GPS, duplicate phone contacts, short gaps between successive and preceding interviews)	Donut/Stacked	
Error Distribution	Errors crosstab (region, interviewer and project filters)	Bar	
Productivity Trends	Contribution of interviewers and regions to the overall count of interviews per project	Line	
Risk	Display against target and timelines	Pop-up Alerts	
Listen-in Efforts	Listened in interviews to target	Donut/Stacked	
Team Retention & Attrition	Total number of interviewers and supervisors engaged and frequency of engagement (count of surveys/projects done)	Bar	
Back-check Efforts	Back-checked interviews to target	Donut/Stacked	
Interview Duration	Length of interview (average per interviewer and per region and per project)	Line	Feasibility of crosstab with productivity

1%

Mitigation

- Held debrief sessions & checked improvements.
- Listened in to the audio recorded interviews.
- Interviewers with major issues were accompanied by Quality Control team.
- Telephonic back-checks were done to affirm the interviews were conducted.

Interview Variable Checks

- As a standard quality-checking procedure, all submitted interviews uploaded in the portal were subjected to validation on key metrics.
- Queries were shared with the field coordinator for review and feedback.

Quality Queries

- Few mentions in other multi-mention questions.
- Self administration by the interviewers.
- Duplicate and missing GPS co-ordinates.
- Inconsistencies in related questions.
- LOI < 50% average.
- Missing telephone numbers and audio recording.

QUALITY ASSURANCE & DATA SAFETY

All information received from the client for the purpose of this research will be treated with utmost confidentiality by Ipsos project team.

Every member of Ipsos involved in this study is committed to this policy and will under no circumstances share any information made available to Ipsos by the client, either in writing or verbally.

Ipsos respects client's rights and will sign a confidentiality agreement for this project, if need be.

GAME CHANGERS

In our world of rapid change, the need for reliable information to make confident decisions has never been greater.

At Ipsos we believe our clients need more than a data supplier, they need a partner who can produce accurate and relevant information and turn it into actionable truth.

This is why our passionately curious experts not only provide the most precise measurement, but shape it to provide True Understanding of Society, Markets and People.

To do this we use the best of science, technology and know-how and apply the principles of security, simplicity, speed and substance to everything we do.

So that our clients can act faster, smarter and bolder.

Ultimately, success comes down to a simple truth:

You act better when, you are sure.

THANK YOU
